LAMINATE DOOR

We at Abhimanya offer high pressure laminate doors that are stunningly beautiful, stronger and durable.

These kind of laminate doors are very popular, best laminates are picked and pressed on to calibrated flush shutters and the side of door will be perfectly edge banded with matching PVC tape.

These kind of doors are more suitable for bedrooms and wet areas like bathrooms & balconies.

INSTALLATION

- ❖ Installation is done with utmost care and precision by our skilled team once we get site clearance.
- ❖ Door frames are installed into site openings with 6 anchor screws, of which 4 hidden and 2 covered with anchor caps for a secured fit.
- ❖ Gaps between the frame and site openings are filled with PU foam and then covered with architraves to provide an aesthetic look and elegant finish.
- ❖ Our site supervisors check the doors to ensure they are functioning properly without any structural, functional and installation issues and will hand over you the keys once they pass our quality check.
- ❖ It is advised to start installation only after all the wet trades on-site are completed, with one coat of paint has been applied on walls to avoid damages that may be caused by various other agencies working on site.

CERTIFICATION & EXCELLENCE

Proud recipients of the 2023 Economic Times Excellence Award for Door Manufacturing, recognized by The Times Group for our commitment to quality and innovation in every aspect of our projects.

Committed to excellence, our doors and door frames bear the mark of quality, backed by our ISO certification, ensuring meticulous adherence to international standards in every aspect of manufacturing and service delivery.

QUALITY CONTROL

Slamming and Shock Resistance Test: Evaluates the durability by subjecting product to repetitive slamming & shocks, to ensure they withstand sudden impacts and wear & tear and remain intact and reliable.

Dimension Accuracy Test: Ensures precise measurements of product to meet specified dimensions for a seamless fit during installation.

Screw Withdrawal Test: Validates the grip strength of screws used in manufacturing.

Impact Indentation Test: Measures the resilience of product to withstand impact against accidental collisions.

Varying Humidity Test: Ensures product maintain structural integrity, ensuring they don't warp under harsh humid conditions.

End Immersion & Glue Adhesion Test: Examines the resistance of product & strength of adhesive bonds to water by immersing their ends, ensuring long-term durability and preventing potential swelling or damage.
